## PERSONAL PROJECTS

**HealthCare Website**(<https://github.com/sahooaditya/Divine-Healthcare>)

- Medical Services Automation System consists of Online Appointment with the Doctor, Details of patient and his/her registration with Hospital, Patient problems/symptoms characteristics, history, family history, drug allergies etc. Patients related images like x-ray, scanning reports etc.
- I work in both the frontend and backend parts of the project, where I develop the frontend using HTML, CSS, Bootstrap and JS, and write the backend code in Python framework Flask, as well as manage the project's database.

**ERP (Enterprise Resource Planning)** (<https://github.com/sahooaditya/ERP-management-system>)

- This project aims to build refers to a type of software that organizations use to manage day-to-day business activities such as accounting, procurement, project management, risk management and compliance, and supply chain operations.
- Here I work in both the frontend and backend parts of the project, where I develop the frontend using HTML, CSS, Bootstrap and JS, and write the backend code in Python framework Flask, as well as manage the project's database.
